

## About ITM

ITM is a privately owned biotechnology and radiopharmaceutical group of companies dedicated to the development, production and global supply of targeted diagnostic and therapeutic radiopharmaceuticals and radioisotopes for use in cancer treatment. We are developing a proprietary portfolio and growing pipeline of targeted treatments in various stages of clinical development addressing cancers such as neuroendocrine cancers or bone metastases. Our main objectives are to significantly improve treatment outcomes and quality of life for cancer patients through a new generation of Targeted Radionuclide Therapies in Precision Oncology. The headquarters are located in the heart of the research center of the Technical University of Munich (TUM).

We would like to fill the following permanent vacancy in hybrid working model in Garching as soon as possible

# Oncology Clinical Development Lead (f/m/d)

**Your role**

**Your profile**

- Member of the clinical development team, with key role of providing clinical oncology strategy to the entire development pipeline and acting as a clinical development lead for assigned compounds during phase 1-3
- Develop and lead the clinical development plans for the assigned compounds, provide oncology expertise and strategic contribution to the entire pipeline, being the core team member for respective program(s), leading the clinical working team and present clinical aspects of the program(s) to the upper management
- Interact closely with other (core team) functions e.g. preclinical development, medical affairs, regulatory affairs, pharmacovigilance, clinical operations, dosimetry in developing compounds through the different clinical development phases and phase transitions
- Lead the design of clinical study protocols, the execution of the clinical trials and the writing of clinical study reports, according to current international regulations and guidelines
- Provide medical leadership to ITM with particular focus as a subject matter expert in oncology
- Support strategic development of the company with the identification and assessment of new molecular entity opportunities, with participation in due diligence activities
- MD or PhD, preferably with a board accreditation in oncology or track record in oncology
- Solid experience (track record of > 5 years in the industry) in oncology clinical development of new chemical entities (early and late clinical stage development, development of the clinical strategy, setting up a clinical development plan and target product profiles in collaboration with other functions), experience in radiotheranostic development would be a distinct advantage
- Solid background in the development of clinical study protocols and study reports including sound knowledge of clinical development methodology and study designs
- Previous experience in due diligence activities
- Sound knowledge of ICH-GCP and other relevant regulations/guidelines
- Experience in interacting with regulatory authorities
- Expertise in leading complex medical and scientific discussions and synthesize and clear communication of information
- Strong team orientation and proven leadership capabilities, combined with the ability to navigate a mid-sized, matrixed organization with a strategic mindset
- Excellent written and spoken English skills, German skills are a plus

- Lead the organization and running of national and/or international expert consultations and multidisciplinary advisory boards
- Contribute to the publications related to clinical data and presentation of results at internal and external meetings
- Ensure integrity of data and interpretation of clinical study results
- Lead the development and medico-scientific interactions with regulatory authorities for assigned development projects (e.g. Investigator Brochures, regulatory dossiers, scientific advice meetings, answering List of Questions)
