

## About ITM

ITM is a privately owned biotechnology and radiopharmaceutical group of companies dedicated to the development, production and global supply of targeted diagnostic and therapeutic radiopharmaceuticals and radioisotopes for use in cancer treatment. We are developing a proprietary portfolio and growing pipeline of targeted treatments in various stages of clinical development addressing cancers such as neuroendocrine cancers or bone metastases. Our main objectives are to significantly improve treatment outcomes and quality of life for cancer patients through a new generation of Targeted Radionuclide Therapies in Precision Oncology. The headquarters are located in the heart of the research center of the Technical University of Munich (TUM).

We would like to fill the following permanent vacancy in a onsite working model in Garching as soon as possible

## Head of Product Management – Radiopharmaceuticals (f/m/d)

**Your role**

**Your profile**

- Lead the end-to-end product strategy for radiopharmaceutical assets, from early development through global launch and lifecycle management, in coordination with Program Leads and Program Managers
- Drive strategic decision-making related to budget, timelines, resource planning, and go-to-market execution
- Lead and mentor a team of product managers responsible for Cross-functional supply strategy; Milestone planning, budgeting, and risk mitigation; Coordination of core and sub-projects; and Preparation of product and project documentation
- Guide the team in overseeing strategic and operational functions related to product development, manufacturing, testing, regulatory compliance, logistics (including 3rd-party SCM), and radiation safety
- Provide leadership in all CMC (Chemistry, Manufacturing, and Controls) related activities, including tech transfer, validation, and documentation at CDMOs and QC labs
- Oversee global project management practices to ensure consistency and successful execution across programs
- Ensure proactive lifecycle management, continuous improvement, and adherence to compliance standards
- Support the creation and maintenance of development plans, launch strategies, and product-
- Proven experience in managing radiopharmaceutical products, with a strong focus on product development, lifecycle strategy, and commercialization
- Deep understanding of CMC and regulatory requirements (USP, Ph. Eur., JP)
- Demonstrated ability to lead cross-functional teams and drive alignment across R&D, Regulatory, Quality, Manufacturing, and Commercial
- Exceptional project management and problem-solving skills with the ability to navigate ambiguity
- Strong influencing, interpersonal, and communication skills—able to effectively collaborate across all levels of the organization
- Fluency in English (spoken and written)
- Advanced degree in life sciences (e.g., Chemistry, Radiochemistry, Pharmacy, or related fields)
- Experience with medical imaging products or theranostics
- Experience leading teams in a launch environment with tight timelines and evolving priorities
- High intellectual curiosity and a commitment to continuous learning
- Willingness to travel as needed (domestic and international, including overnight travel)

related commercial and educational materials

- Act as a subject matter expert to support sales efforts and engage with key stakeholders
- Represent ITM at scientific congresses, customer and CDMO site visits, and other strategic engagements to foster partnerships and industry visibility

## Our offer

- Exciting challenges in an up-and-coming and fast-growing company with a high degree of creative freedom
- An open working atmosphere in an international corporate culture with short communication channels
- Comprehensive onboarding programme
- Flexible working hours with home office options
- Attractive special payments
- Just a good salary? Not with us! We also offer you
  - Employee participation programme
  - Job bike or subsidised job ticket
  - Above-average contribution to the company pension scheme
  - Individually tailored further training programme (including German and English courses)
  - Health promotion programmes (e.g. EGYM Wellpass, subsidy for local fitness studio, sponsorship of sporting events, various lifestyle coaching sessions)
